

Job Description			
Fill in The Blanks Below			
Position Title:	Intern	FLSA Classification:	Non-Exempt
Reports To:	VP, New Product Development	Contract Work:	Fall Semester
Location:	Atlanta	Last Reviewed:	07-2010

**Position Summary** (A broad statement that captures the essence and overall purpose, 2-4 sentences.)

Individual will be responsible for software development, configuration management and test planning for a new, innovative Wireless ECG monitoring system. The perfect candidate will participate as a full member of the collaborative multidisciplinary LifeSync development team designing and developing the next generation product line.

Ideal candidate will be familiar with the C programming language, subversion (or similar) version control system, and debugging embedded computer controlled electronic systems. An understanding of or interest in learning the issues with real time systems, high speed analog to digital conversion, on body sensor systems, short range wireless protocols such as Bluetooth or Zigbee, data communications, MatLab modeling, LabView, GPIB test gear, reading schematics, operation of test gear such as oscilloscopes and multimeters, and soldering skills, would be helpful but are not required.
